## Contenido

1. [display](#) (#display)
2. [Flexbox \(display:flex\)](#) (#flex)
3. [Grid \(display:grid\)](#) (#grid)
4. [position](#) (#position)
5. [transform & transition](#) (#transform)

### display

```
.bloque { display: block; }  
.inline { display: inline-block; }
```

Referencia MDN: [display](https://developer.mozilla.org/es/docs/Web/CSS/display) (https://developer.mozilla.org/es/docs/Web/CSS/display)

### display: flex — Flexbox

```
.contenedor { display:flex; gap:12px; align-items:center; }  
.item { padding:8px; border-radius:8px; }
```

Contenedor flex con elementos alineados en fila.

Referencia MDN: [Flexbox](https://developer.mozilla.org/es/docs/Learn/CSS/CSS_layout/Flexbox) (https://developer.mozilla.org/es/docs/Learn/CSS/CSS\_layout/Flexbox).

### display: grid — Grid

```
.grid { display:grid; grid-template-columns: 1fr 1fr; gap:12px; }
```

Referencia MDN: [Grid](https://developer.mozilla.org/es/docs/Web/CSS/CSS_Grid_Layout) ([https://developer.mozilla.org/es/docs/Web/CSS/CSS\\_Grid\\_Layout](https://developer.mozilla.org/es/docs/Web/CSS/CSS_Grid_Layout))

## position

```
.rel { position: relative; }  
.badge { position: absolute; top:8px; right:8px; }
```

Referencia MDN: [position](https://developer.mozilla.org/es/docs/Web/CSS/position) (<https://developer.mozilla.org/es/docs/Web/CSS/position>)

## transform y transition

```
.tarjeta { transform: translateY(0); transition: transform .22s ease; }  
.tarjeta:hover { transform: translateY(-8px) scale(1.02); }
```

Referencia MDN: [transform](https://developer.mozilla.org/es/docs/Web/CSS/transform) (<https://developer.mozilla.org/es/docs/Web/CSS/transform>) — [transition](https://developer.mozilla.org/es/docs/Web/CSS/transition) (<https://developer.mozilla.org/es/docs/Web/CSS/transition>)
